

SAMBRAM S SANGALAD

Email: sambramss7@gmail.com | Phone: +(91) 9449885317 |
GitHub: <https://github.com/Sambram123> | LinkedIn: <https://www.linkedin.com/in/sambram-sangalad-1b514a2a5/>

Technical Skills

Programming Languages: JavaScript, Python, C/C++
Web Technologies: HTML5, CSS3, Bootstrap, React.js, Node.js, Express.js, MongoDB, MYSQL, Git, Github
AI/ML Technologies: Machine Learning, Deep Learning, Data Analysis, NumPy, Pandas, Scikit-learn

Projects

- RentEase – Property Rental & Booking Platform [Github]****May 2026 - Present**
 - Developed a full-stack MERN-based property rental platform enabling apartment listing, online booking, advance rent payments, and owner/tenant dashboard management with real-time property location support.
 - Built using React, Node.js, Express.js, MongoDB, Firebase Authentication, Razorpay, and Google Maps Platform.
 - Live Demo :** <https://rent-ease-property-rental-booking-p.vercel.app/>
- Industrial AI Safety Monitoring Platform [Github]****Feb 2026 - Present**
 - Built an industrial safety monitoring solution that detects PPE compliance and employee status from live camera feeds, generates safety reports, and visualizes data in a web dashboard.
 - Implemented using Python AI modules with OpenCV and YOLO, a Flask backend with SQLite, and a React/Tailwind/Vite frontend for real-time dashboarding and reporting.
- Cloud-Based File Management System [Github]****May 2026**
 - Developed a responsive web application enabling secure user authentication and comprehensive file management system with file uploads (PDF, DOC, images, audio, video), real-time previews, and cross-device accessibility through Firebase backend services.
 - React 18, Firebase, Material UI ,Cloudinary, React Router for navigation, and Context API for state management.
 - Live Demo :** <https://notes-app-ec71c.web.app/>

Experience

- Tata Group Data Analytics Job Simulation****May 2026 – June 2026**
 - Completed a Tata iQ Financial Services job simulation, applying AI-powered data analytics, exploratory data analysis (EDA), and GenAI tools to assess data quality, identify risk indicators, and generate predictive insights.
 - Developed a predictive modeling framework using GenAI to evaluate customer delinquency risk, with structured model logic, evaluation criteria, and data-driven recommendations.

Education

Bachelor of Engineering in Computer Science
Jain College of Engineering and Technology,Hubli

GPA: 8.8/10.0
June 2027

Certifications and Achievements

- Complete AI, Machine Learning & Data Science Bootcamp [Certificate]****Oct 2025 - Feb 2026**
- Generative AI Certification – NPTEL (IIT Collaboration) [Certificate]****Aug 2025 - Oct 2025**
- Full Stack Web Development Certification [Certificate]****Jan 2025 - Aug 2025**
- Secured 2nd Place** in a Hackathon organised by JCET,Hubli for developing “TrustLedger” — an AI-powered milestone-based escrow platform enabling secure and transparent freelance transactions using MERN Stack, PostgreSQL, Prisma, Socket.io.
